Applicants believe that the claims of U.S. Pat. No. 6,510,381 mistakenly fail to claim the full extent of their invention to which they are entitled. In particular, the specification at col. 5, lns. 27-30 discloses that "[o]nce the PPP connection is established, vehicle position data updates are transmitted, intermittently, each time one of the configured timers, either time or distance, has expired 370"; and the specification at col. 6, lns. 25-31 discloses that "[f]or example, configuration message 315 allows the user to change and reload 325 the setup parameters in order to change the interval at which data is transmitted 370 from device 5 to server 230. Processor 60 is further configured to respond 335 to a configuration inquiry 345 from server 230 regarding the current configuration of parameters stored in EEPROM 70." There are no claims directed to these novel features. In addition, Applicants believe that claims 1-3, 6, 7, 10-15 and 18 contain errors, which render the claims wholly or partly invalid.
